

Mostafa Kamar

Full Stack Web Developer |
MERN & Tailwind CSS

CAREER OBJECTIVES

I mainly use React and Tailwind CSS and Have good experience in using the full MERN stack.

I am a medical Student Who Fell in love with coding at first sight. As I continued to grow my knowledge about the science, I fell more and more for it. It started as a hobby, Just create beautiful things, but after some time I wanted to have a career in it. I always aspire to learn and improve my skills. I am also interested in sharing my knowledge to others and teaching them the art of coding.

SKILL SET

- REACT
- Tailwind CSS
- NextJs
- HTML
- CSS
- JavaScript
- Node.js
- Express
- MongoDB
- Firebase
- HTML5 Canvas
- GIT
- GSAP
- Axios
- TypeScript (beginner)

PROJECTS

COMFORTINA

E-commerce Furniture Site built with React, TailwindCSS, Express and MongoDB

- Built the Site to be Responsive on all devices
- Used Context API for State Management
- The Styles were made by Tailwind CSS
- The frontend is Connected to the backend API that I've made
- Lazy loading of Routes
- The Store API has 2 Databases: one for users and the other for the products
- Created an endpoints for registering new users and logging in the existing users
- Full Authentication system with Tokens and Hashed Passwords
- Each User has a cart and Wishlist which are connected to the frontend
- Built endpoints for CRUD operation on products with an authorization system
- Integration of Search Functionality for different products by name and category
- The database contains data from Jumia that I scrapped using a scrapper I've made [here](#)

- GitHub: <https://github.com/mostafakamar2308/comfortina>

MEMORIES

Online Diary created using Firebase and React

- Built a web app for users to store their own diary entries, using React.
- Integrated Firebase storage to store diary entries for each user.
- Implemented login and logout capabilities.
- Deployed the application for public use by using Firebase Hosting
- Live: <https://people-memories.web.app/>
- GitHub: <https://github.com/mostafakamar2308/memories>

WRITER'S PORTFOLIO

portfolio made for a Wattpad Writer to show her works and interact with her audience.

- Integrated HTML5 Canvas to make an interactive background and a drawing section for users to draw pictures
- Integrated the ability to send to the author the messages with the sender name and drawing.
- Implemented Firebase storage to store the received image and the author can select which is going to be shown on her website.

- GitHub: <https://github.com/mostafakamar2308/Writer-MS>

EDUCATION

2019 - Present | Faculty of medicine Tanta University

EXTRA CURRICULAR ACTIVITIES

- Coding Mentor for the media Team of TSRA academy of research
- Researcher in TSRA academy of research
- Volunteer at LifeMakers Charity
- Was Volunteer and HR at Insan Charity of Tanta university
- Was a leader of Missions team in Insan Charity

CURRENT GOAL

- Learn how to use TypeScript with React
- Finish Grokking Algorithms
